climate action

OPTIMISED PRODUCTION

- Investment in heat exchangers, softeners, and steam networks
- Improved cleaning protocols
- Smarter production scheduling

EMPLOYEE AWARENESS

Internal Water saving programs

Wastewater treatment & circular economy

- 100% of wastewater is treated since 2014 by an on-site methanation plant
- Pollution reduced by 80%
- Biogas produced from organic matter like sugar

WHAT'S NEXT?

Maintain water usage below

- 2 litres per litre of syrup produced.

Introduce new tools and methods to:

- Enhance consumption monitoring
- Optimise production schedules
